

SUMMARY OF EXAMINER INTERVIEW

Applicants would like to thank the Examiner for granting an interview on June 12, 2008. As discussed, the Krause reference does not describe managing the transfer of data at a layer above the transport layer. In addition, the Bolik reference does not describe buffering on both sides of the transmission of data. Finally, the Examiner agreed to withdraw the 35 U.S.C. 112 rejection because encapsulation of data is described in paragraph 7 of the as filed specification.
